

SECRET

25 YEAR RE-REVIEW

Wednesday, 21 July 1954

Dear Chief:

Reference is made to my Memorandum to you Monday regarding the approach made to me by our mutual friend to study certain documents which had come into the session of the Jenner Committee.

At 2155 last night I received a phone call from an individual who stated that he was Ben Mendel, a member of the staff of the Jenner Committee. He asked if I would come down and study, and give the staff an interpretation of the import of certain documents which they hold. I told him that I was not in a position to do anything of that nature and that any request for my appearance would have to come through you.

It developed that the scope of their inquiry is much broader than was indicated to me by our mutual friend and includes not only the so-called McCormack plan but also those executive orders and directives which the committee staff believes were prepared by George Schwarzwald~~er~~ in the Budget Bureau.

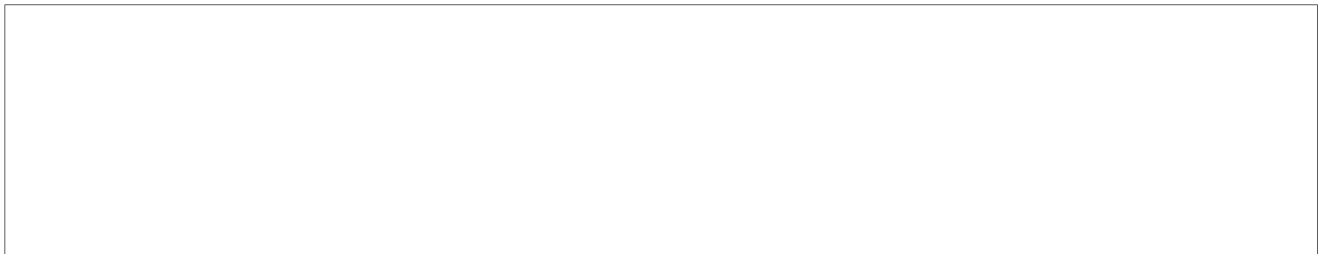

In the light of this and in the event that there are factors or information to which I am not privy, but which in your opinion dictate that I should personally and unofficially contact either Senator Jenner or Senator McCarran to learn more about this, I shall be glad to do so.

Sincerely,

25X1
